

CANCELLATION POLICY

Your willingness to participate in the USN Flying After Diving Study is greatly appreciated.

A total of 10 research staff members are required to conduct each trial. Staff members take great pride in their involvement and each plays an important role in the smooth operation and success of this study. Your participation is equally important. Without your membership support and willingness to be a research subject we could not begin to answer important research questions.

Because of the great amount of time and effort it takes to coordinate each trial, we ask that you please let us know at least seven days in advance if you find it necessary to cancel or reschedule your participation. This will hopefully allow us enough time to fill your spot. Should it be necessary to cancel a trial (we must have a minimum number to run a study) we will have adequate time to notify the other participants and staff.

We commend your commitment to support diver safety and we look forward to our research partnership with you.
